

## SPRINT PLANNING:

- **GOAL:**

Develop a prototype application that is competitive with existing food delivery platforms, with a focus on user authentication, restaurant search, menu viewing, ordering and checkout, and order tracking.

- **TEAM CAPACITY:**

5 developers, 1 software tester, and 1 product owner.

- **TEAM AVAILABILITY:**

All team members are available full-time for the next month.

- **ESTIMATED TIME:**

1 month.

- **ITERATION:**

2 per week.

- **REQUIRED STAFF:**

The current team size is adequate for the project.

However, additional resources may be required if the project scope expands beyond the current backlog.

- **OUTPUT:**

- Deliver a working prototype application to the client every week.
- Conduct meetings with the business owners to review progress and test the application.
- Test and fix all bugs that arise during development.
